Loosely Coupled Endpoints	**End-to-End Security**	**Return on Integration Asset (ROIA)**	**Precise Governance and Control**
Detailed Logging and Reporting	**Global Visibility and Auditability**	**Guaranteed Delivery**	**Cloud Service**

Thru + MuleSoft Benefits

Onboarding Simple and fast partner onboarding via admin web portal.

Built for MuleSoft Manage and operate file transfers from within the MuleSoft Anypoint Platform. Leverage your investment in your iPaaS.

No Coding or Scripting Web-based configuration and management.

API-Centric Thru native connector for Mule to exchange data.

Pub Sub Design Simple configurations replace multiple point-to-point connections with flexible subscriptions in a loosely coupled system.

Guaranteed Delivery Data is never lost, stored in Thru persistent cloud storage.

Monitoring and Control Single pane of glass for internal and external file exchange scenarios.

Cloud Native No deployment or maintenance.

**Subscription License** Most cost-effective and easily adaptable strategy to budget and scale. Enterprise customers pay for what they use.

Thru Natively Integrated in MuleSoft Flows

1. New business partners created in Salesforce are pushed to MuleSoft Anypoint Platform.
2. MuleSoft can create and publish File Transfer Process via the Thru Management API.
3. Trading partners are subscribed to File Transfer Process and partner self-management can be enabled or offered to manage endpoints.
4. Thru provides guaranteed delivery or collection.
5. Files that require MuleSoft can be consumed directly from the MFT service via the Thru Connector.
