boomi Certified Cloud Managed File Transfer Solution

DESIGN, BUILD AND INTEGRATE FILE TRANSFERS INTO BOOMI PROCESSES

Thru[®] and Boomi, a Dell Technologies Business, have partnered to develop the Thru managed file transfer (MFT) connector for the Boomi AtomSphere iPaaS platform. The Thru MFT Connector for Boomi provides out-of-the-box, cloud file transfer capabilities for your Boomi processes.

Thru Key Features

1. Guaranteed Delivery

Thru is a persistent MFT platform, all files are securely stored until delivered. (Retry, auto-resume, exception handling and notifications.)

2. Highly Secure

Thru uses the latest enterprise-grade virus scanning and end-to-end encryption technology. (Data is never stored in the DMZ.)

3. Scale and Performance

Thru is a cloud MFT solution, giving you the power and flexibility to custom-fit capacity. (Highly available, instantly scalable, load balanced and fault tolerant.)

Thru + Boomi Benefits

Production Ready Get started right away! Thru is cloud-native, no need to procure and provision software / hardware – Thru is already deployed.

Built for Boomi Leverage your investment in Boomi. Manage and operate file transfers from within the Boomi AtomSphere iPaaS platform.

No Coding or Scripting Just point-and-click to configure new B2B integrations between enterprise lines of business and trading partners from within Boomi.

Fast Partner Onboarding Onboard partners within minutes, not days, allowing faster decision making and ROI.

Loosely Coupled Endpoints Add / remove trading partners with no impact on file transfer operations. Endpoints are loosely coupled, not hard-coded or scripted.

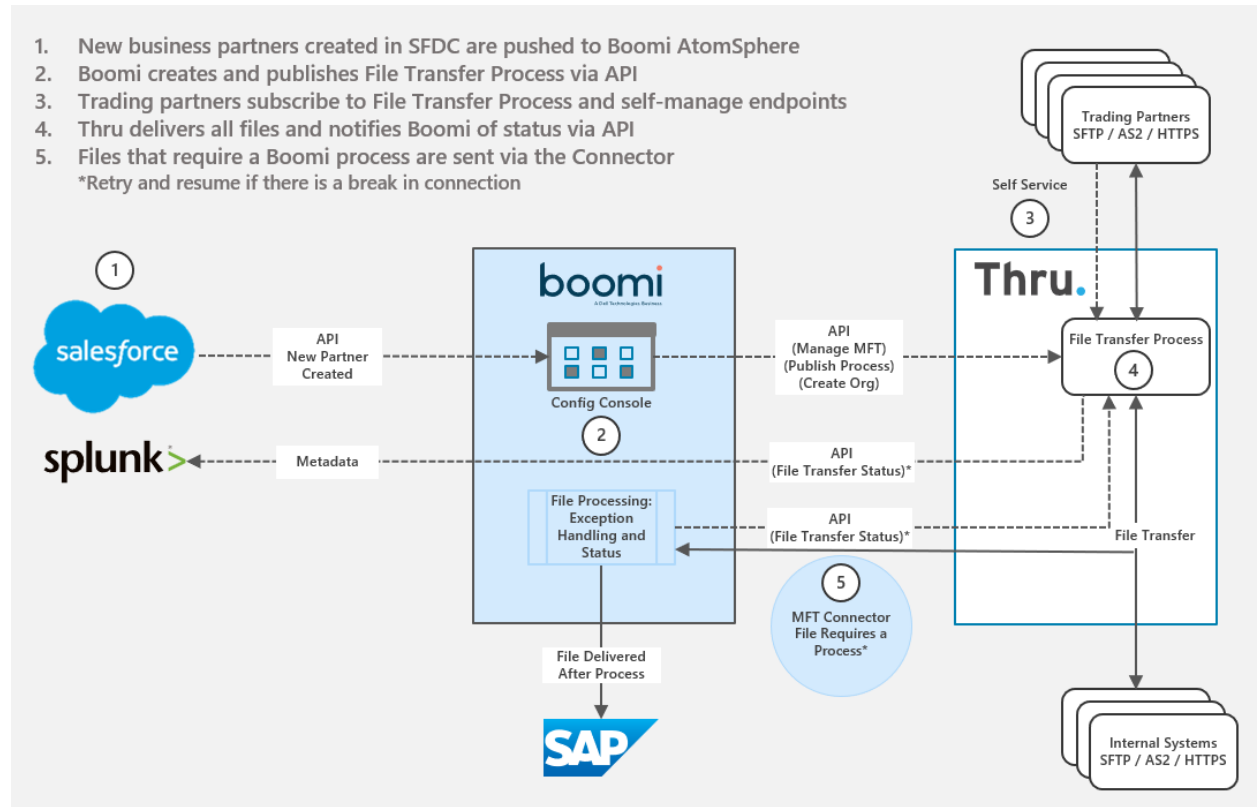

Precise Governance and Control Control who has access to what files, when and where. Configuration capabilities include delegated administration and granular user permissions.

Detailed Logging and Reporting Demonstrate compliance with data privacy standards and regulations. All file transfer events are recorded for system-wide visibility, auditability and reporting.

Enhanced Business Agility Thru helps enterprises increase operational efficiency, reduce security and compliance risks and free up resources to focus on innovation.

Thru Natively Integrates in Boomi Processes
