Thru.

MuleSoft® Cloud Managed iPaaS File Transfer Solution

DESIGN, BUILD AND INTEGRATE FILE TRANSFERS INTO MULESOFT FLOWS

Thru® and MuleSoft® have partnered to develop the Thru Managed File Transfer (MFT) Connector for the MuleSoft Anypoint Platform™. The Thru MFT Connector for MuleSoft provides out-of-the-box, cloud file transfer capabilities for your MuleSoft flows.

Thru Key Features

Built for MuleSoft	Production Ready	No Coding or Scripting	Faster Partner Onboarding
Loosely Coupled Endpoints	End-to-End Security	Return on Integration Asset (ROIA)	Precise Governance and Control
Detailed Logging and Reporting	Global Visibility and Auditability	Guaranteed Delivery	Cloud Service

Thru + MuleSoft Benefits

Onboarding Simple and fast partner onboarding via admin web portal

Built for MuleSoft Manage and operate file transfers from within the MuleSoft Anypoint Platform. Leverage your investment in your iPaaS

No Coding or Scripting Web-based configuration and management

API-Centric Thru native connector for Mule to exchange data

Pub Sub Design Simple configurations replace multiple point-to-point connections with flexible subscriptions in a loosely coupled system

**Guaranteed Delivery** Data is never lost, stored in Thru persistent cloud storage

Monitoring and Control Single pane of glass for internal and external file exchange scenarios

Cloud Native No deployment or maintenance

Subscription License Most cost-effective and easily adaptable strategy to budget and scale, enterprise customers pay for what they use

Thru Natively Integrated in MuleSoft Flows

1. New business partners created in SFDC are pushed to MuleSoft® Anypoint Platform™
2. MuleSoft creates and publishes File Transfer Process via API
3. Trading partners subscribe to File Transfer Process and self-manage endpoints
4. Thru delivers all files and notifies MuleSoft of status via API
5. Files that require a MuleSoft flow are sent via the Connector
   *Retry and resume if there is a break in connection
