

work  
**SECURELY**  
without leaving  
Microsoft Office  
365

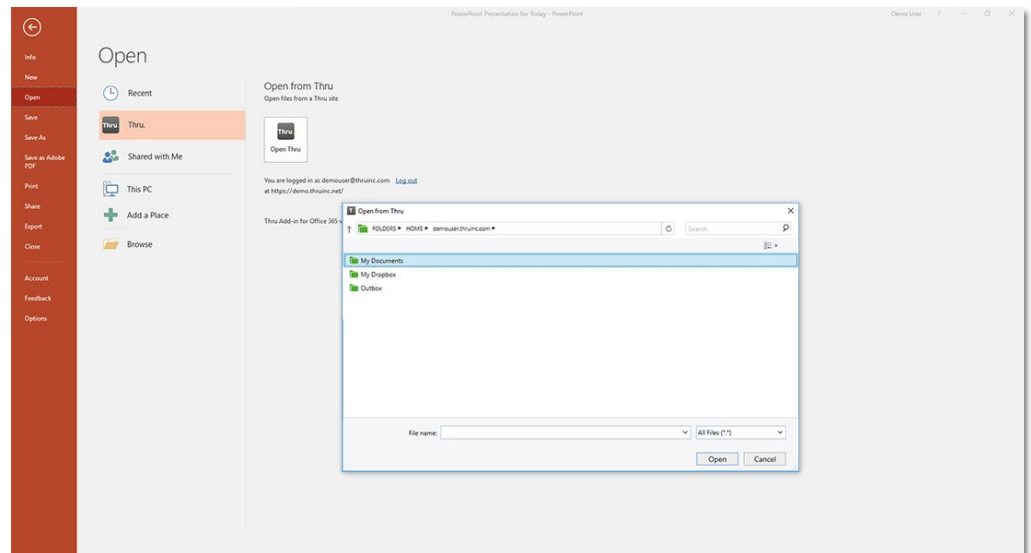

Open, create, edit and save files to Thru Cloud directly from Office 365 applications Word, Excel and PowerPoint. Skip the web browser logins, save time and enjoy limitless versioning.

## View Thru Cloud within Office Desktop Apps

Open and view your Office files stored in Thru from your Microsoft Office desktop applications.

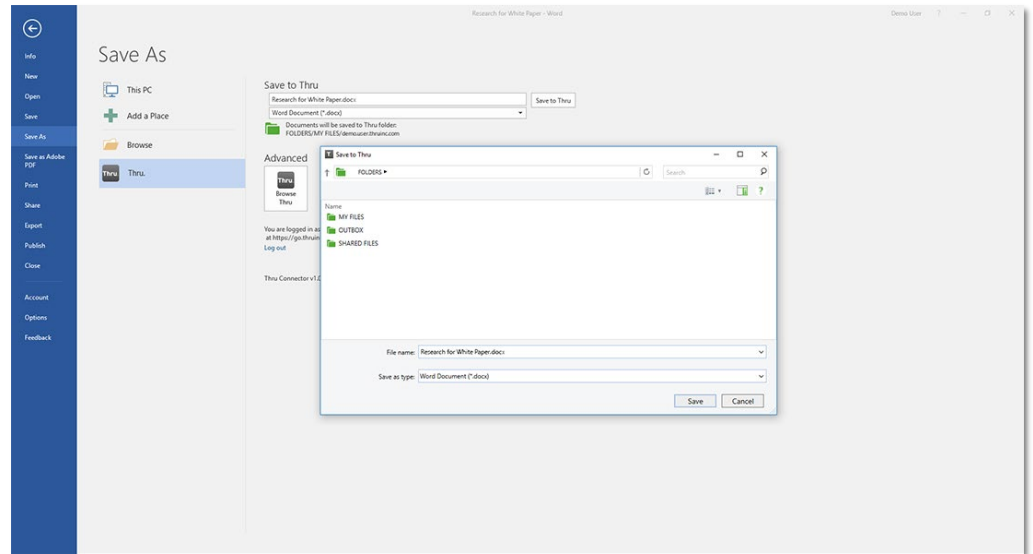

- Easily collaborate from Office 365 with the ability to access any of your Office files that are shared within Thru
- Securely connect to any Thru site to which you have access
- Open files in Word, Excel and PowerPoint (32-bit and 64-bit)

## Create/Edit Files and Save to Thru

Instead of leaving Office 365 to add new files/edits to Thru, simply create and edit files from your Office applications and save them directly to the Thru Cloud.

- Save and Save As features allow saving directly into your Thru repository
- Edit files with no need for a local copy
- All actions are logged in Thru and can be viewed by IT administrators

## Track Version History in Thru Cloud

Track the edit history of your Office files with Thru's versioning feature.

- Automatically create new versions of files in Thru every time files are saved
- View transaction details such as the name of the editor, the time of the edit and the file's owner
- Easily restore files to a different version
